

VISUAL DISPLAY UNIT ZED601

for connector DIN 43 650 DIN 43650

Specification:

Microprocessor visual display unit ZED601 is built-in to a current loop of a transducer 4...20 mA, which does not require any auxiliary power supply. It is possible to connect with any type of transducer using DIN 43 650 connector. ZED601 is equipped with a sturdy plastic case and is installed between power supply and the transducer. Comes with 3 1/2 local display, height 7,6 mm, turning in 90° angle.

Description:

- 3 1/2 for display
- 4 digit to display temperature
- simple operation, easy operation
- 4~20mA analog output (optional)

TECHNICAL PARAMETERS			
Measurement medium	gas or liquid compatible with stainless steel	Ambient temperature range	0°C~+60°C
Output signal	4~20mA	Storage temperature range	-30°C~+60°C
Accuracy	0.2%FS(standard)	Electrical connection	DIN 43650
Display accuracy	0.1%FS	Protection	IP65
Temperature drift	0,1%	Dimensions	42 x 42 x 42mm
Voltage drop	<5
